

CONTUREX ARTIS⁺

Your Entry into Flexible Window Manufacturing

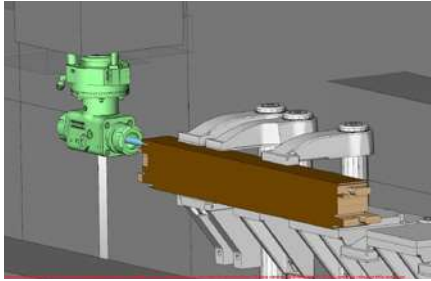

WEINIG Conturex Artis⁺: Top Performance also in the Entry Class

The diversity of today's construction elements is reflected in production. Mass-produced windows and doors have long become the exception. Individual products are now in demand. The number of shapes, colors, wood types, window systems, wood thicknesses, etc. is greater than ever.

That's where the Conturex Artis⁺ comes in handy! Frame by frame window production under new aspects: it takes on milling, drilling, machining of corner joints and lengthwise profiling with utmost precision, full automation and high flexibility, doing the work of 5 machines in a single machine. The Artis⁺ offers all the benefits of the approved Conturex series at an attractive price, making it suitable for small scale businesses as well as large window and door manufacturers. WEINIG can offer you the benefit of the experience of more than 3,500 installed window machines.

WEINIG Sim

- More convenience and safety through visualization of production data
- Collision control through simulation

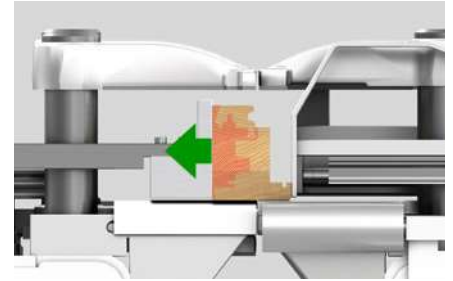

WEINIG CAM

- A full 3D CAD/CAM system for individual designs
- Simple and fast programming

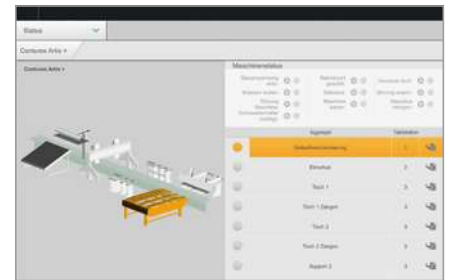

Universal spindle with 5-axis technology

- High flexibility due to universal use
- Ideal for drilling and milling work
- 17 kW (S6)

PowerGrip RePos easy

- Even more flexibility with thin profiles and new window systems
- Best surface quality thanks to the WEINIG RePos clamping system

WMC control

- Intuitive and user-friendly control interface
- Process reliability through isometric representation of the machine elements and status display

The WEINIG Conturex Artis+ has a lot to offer

- Complete processing in one clamping for maximum precision
- High availability
- Processing without retooling, even for the smallest batches
- Automation enables less manpower in production
- Energy recuperation modules means savings in energy
